

NGUYEN TRUNG TRUC

FULL-STACK DEVELOPER

Hanh Thong Ward, Ho Chi Minh City | (+84) 967 591 600 | trungtruc.dev@gmail.com

PROFESSIONAL SUMMARY	• Full-stack Developer with 4+ years of experience designing, developing, and maintaining scalable web applications using Laravel and RESTful APIs. • Experienced in building enterprise management systems, CMS platforms, and internal business applications with strong expertise in frontend architecture, backend integration, database optimization, and performance enhancement. • Skilled in delivering secure, maintainable, and production-ready software solutions while collaborating effectively in Agile/Scrum development environments.
-----------------------------	--

TECHNICAL SKILLS	Frontend: Vue.js, React, JavaScript (ES6+), HTML5, CSS3, Responsive Design Framework: Laravel(PHP), Nextjs(React), Java Spring Boot(Java) Backend: PHP, Laravel, Java, RESTful API Development Database: MySQL, PostgreSQL, SQL Server, MSSQL DevOps / Tools: Docker, Git, GitLab CI/CD, Postman Architecture / Concepts: MVC, RBAC, Authentication & Authorization, System Design, Performance Optimization Methodologies: Agile, Scrum, Cross-functional Collaboration
-------------------------	--

PROFESSIONAL EXPERIENCE	NASANI SOFTWARE TECHNOLOGY COMPANY LIMITED 07/2022 – 05/2026 Full-stack Developer • Developed and maintained scalable web applications for multiple enterprise clients using Laravel and MySQL. • Designed backend architectures, database schemas, and business logic modules to support maintainable and scalable software solutions. • Built secure and reusable backend functionalities based on client business requirements while ensuring performance and scalability. • Collaborated with UI/UX designers and frontend developers to integrate responsive frontend interfaces with backend services. • Conducted software testing, debugging, deployment, and production maintenance to ensure application reliability and stability. • Participated in Agile/Scrum workflows to deliver high-quality software solutions within project timelines.
--------------------------------	--

AHIT CORPORATION 01/2021 – 02/2022 Frontend Developer • Contributed to the development of an enterprise employee management platform with access control and data management functionalities. • Designed and implemented responsive UI components to improve user experience across desktop and mobile devices. • Developed a cross-platform attendance application integrated with Laravel backend APIs and database systems. • Collaborated with backend engineers and design teams to optimize application performance and deployment workflows. • Supported Docker-based deployment and maintenance processes for development and production environments.

SELECTED PROJECTS

Matchix – Sports Booking & Community Platform

02/2026 – 05/2026

Tech Stack: Spring Boot, Java, Next.js, React, React Native, PostgreSQL, Redis, RabbitMQ, Elasticsearch, Microservices Architecture, REST APIs, SSE, Logto, Cloudinary, MapLibre, Tailwind CSS.

- Participated in developing the Booking Service within a microservices-based architecture, supporting booking workflows and business logic implementation.
- Designed and implemented the Home page UI and Team Matching module UI for the web platform.
- Integrated frontend components with backend services by implementing API consumption and data rendering for booking, team, and related functionalities.
- Built the React Native application architecture, including project structure, navigation flow, reusable components, and core setup.
- Developed the Home screen on the mobile application with dynamic content integration.
- Implemented the Team Matching feature on the mobile application, enabling users to create and discover team recruitment posts.

Achievement:

- Contributed to a microservices-based sports booking and player-matching platform.
- Developed Booking Service and integrated APIs across web and mobile systems.
- Built React Native application architecture and implemented Home and Team features.
- Delivered responsive UI and dynamic data integration for web and mobile platforms.

Movie Ticket Booking System

11/2025 – 01/2026

Tech Stack: PHP, Laravel, MySQL, Blade, Bootstrap, JavaScript, jQuery, AJAX

- Developed a full-stack movie ticket booking platform using Laravel and MySQL.
- Built features including authentication, movie browsing, showtime scheduling, seat selection, online booking, and booking history.
- Developed an admin dashboard to manage movies, cinemas, screening rooms, showtimes, bookings, users, and revenue statistics.
- Applied Laravel MVC architecture, Eloquent ORM, RESTful APIs, and AJAX to improve application performance and user experience.

Achievement:

- Delivered a full-featured movie ticket booking system from development to deployment.
- Built a comprehensive admin panel for managing movies, bookings, and users.
- Improved system performance and user experience through optimized database queries and AJAX-driven interactions.

Machine Operation Management Website – SGC (Steel Company)

07/2024 – 05/2025

Tech Stack: Vue.js, Vue Router, Pinia, .NET API, SQL Server

- Developed an enterprise machine operation management system to automate packaging workflow processes and improve operational efficiency.
- Implemented secure authentication, authorization, and RBAC modules integrated with .NET REST APIs.
- Built employee and machine management modules supporting dynamic parameter input and automated remote SQL Server data retrieval.
- Configured Vue Router and Pinia for scalable frontend routing and centralized state management.
- Optimized remote database connectivity and API communication to ensure secure and stable enterprise deployment.

Achievement: Successfully delivered a production-ready enterprise solution that improved workflow automation and internal operational efficiency.

CMS Nina Company System

08/2023 – 06/2024

Tech Stack: Laravel, Vue.js, MySQL

- Developed a CMS platform for managing articles, categories, users, and role-based permissions.
- Designed relational database schemas and migration structures for scalable content management architecture.
- Built RESTful APIs and integrated Vue.js frontend interfaces with Laravel backend services.
- Developed CRUD functionalities for dynamic content creation, editing, publishing, and administration.
- Implemented authentication and authorization using Laravel Guards and Middleware.
- Built a responsive admin dashboard with optimized navigation and data-binding.

Achievement: Delivered a scalable CMS platform that improved content management workflow and administrative efficiency.

Bookstore Management System

10/2022 – 01/2023

Tech Stack: C# .NET MVC, Entity Framework, SQL Server

- Developed a web-based bookstore management platform supporting online sales and order processing.
 - Designed MVC architecture for modular and maintainable software structure.
 - Built database models using Entity Framework Code First and implemented CRUD functionalities.
 - Developed authentication, shopping cart, and order management modules.
 - Optimized SQL queries to improve database performance and data retrieval efficiency.
-

EDUCATION

Bachelor of Information Technology

Ho Chi Minh City University of Industry

2018 – 2022
